Subject: SAVE THE DATE: Wednesday, May 17th: Information sharing webinar for the Sugar Pine Bridge hydrologic study
Date: Thursday, April 27, 2017 9:59:41 AM

Sugar Pine Bridge Consulting Partners:

Based on input from the various participants, the park has scheduled the Sugar Pine Bridge Study webinar for **Wednesday, May 17th from 10:00am until noon** (PST). As previously mentioned, Juliana Birkhoff from the Center for Collaborative Policy will be hosting and facilitating the update; researcher Derek Booth will be doing the presentation. Jim Roche (NPS hydrologist) and Greg Stock (NPS geologist) are also planning to be online to answer any questions directed at park staff.

You will be receiving web link information for the presentation. It will be a recorded event, so if you can not make the proposed date, the information presented would still be available on the park's webpage for later viewing.

Please feel free to call with any questions.

As always, any thanks

Sugar Pine Bridge Consulting Partners:

The park is planning on holding a webinar to update stakeholders on the Sugar Pine Bridge study on either Wednesday May 3rd or Thursday May 4th. Juliana Birkhoff from the Center for Collaborative Policy will be hosting and facilitating the update; researcher Derek Booth will be doing the presentation. Jim Roche (NPS hydrologist) and Greg Stock (NPS geologist) are also planning to be online to answer any questions directed at park staff.

You will be receiving official notification of the webinar shortly. It will be a recorded event, so if you can not make the proposed date, the information presented would still be available as a recording.

This is a straightforward presentation on the research-to-date including research plans for this spring and summer. **This is not a decision meeting.** Should any of you wish to follow-up this webinar with additional consultation, we could then schedule subsequent discussions with the researchers/park staff. I am assuming we would approach that question following the presentation.

If you do hope to participate in the webinar and have a preference for either date, please let me know at your earliest convenience and the park will forward your request on to the researchers coordinating the presentation.

We will be sending follow-up notification to you once we have a set date and time for the webinar and will also be forwarding the notes from the last meeting.

Please feel free to call with any questions.

As always, any thanks
